The products contain a specifically-designed balance of calories with high-quality protein and important vitamins and minerals. Each ingredient is important to the balance and nutritional value of the meal. All of the ingredients in the packages should be used to provide balanced and nutritious meals.

This cookbook provides some examples of how the MannaPack™ products can be used as a part of a balanced diet prepared in a variety of ways. Each product is vegan and halal certified, which allows cooks the opportunity to be creative to match nearly any cultural or food preferences.

The **MannaPack™ Rice** product can be enhanced for both variety and nutritional value through its use in recipes that are tailored to the cultural preferences and regional resources.

Adding vegetables and protein foods gives these meals and the children or adults who consume them an even bigger nutritional boost.

MannaPack™ Potato-W was built to be a solid weaning and complementary food to fill the gap beyond exclusive breastfeeding and a baby's consumption of family foods. While it contains the nutrients in the balance and amounts recommended by the World Health Organization for children 7-12 months old, it can be used as a base for recipes that include other sources of calories, such as vegetables, fruits, protein foods and fats.

CONCLUDING THOUGHTS FROM CHEF

There are times in life when you have to make a choice: the choice either to accept what you have and be comfortable and content in your place, or to break out on an adventure, take a risk and accept a challenge. By choosing the latter, you give life your all and know that you could make a difference in the life of a person who goes on to change the world. Nowhere have I been tested on my fundamentals and principles as they pertain to my life's philosophy as much as in Tijuana, Mexico, where I stumbled upon a group of people truly dedicated to the betterment of the less fortunate. This group supports over 60 orphanages throughout Tijuana alone by facilitating the procurement of goods such as medical supplies, produce and most importantly, MannaPack™ products. In our work with MannaPack™ products, we discovered that they were underutilized, and if I could offer my experience from living in developing countries, coupled with a lifetime career in culinary arts, we could make a difference and create positive change.

They say in life we know not when or why opportunity comes, but we can be sure that it will. I reached out to Feed My Starving Children and pitched a plan, one that would give people options to take the nutrition that MannaPack™ products provide and transform it into different meals using locally sourced, nutrient dense and affordable ingredients. Our belief as chefs is that access to healthy food is, at its very basic fundamentals, the most important human right. Food has become seemingly more so a privilege, and our aim is to help even the playing field as best we can by collaborating with Feed My Starving Children and its partners to eliminate hunger. While hungry is a word many of us often use, starving is one most of us will never know. We are blessed to have the opportunity to work with such an amazing team of driven givers who answered the door and said yes. With them, we will depart from the routine, normal and comfortable to take a leap of faith into the unknown and give of ourselves to those most in need.
